I visited who is acting DD/O and discussed with him the sensitivity training provided by OTS. What our conversation amounted to was that I was seeking to deter-

mine how accepting the DD/O was of this training course. It turns out that training about the

course but has not had the evidence needed to turn it down.
Rather, he has been given a series of so-called testimonies
from those who have participated as to the course's advantage.
I advised that I considered the course a high-risk course

and did not find it acceptable. I indicated we would be discussing next our views with OTS but anticipated that the final outcome would be a memorandum from me to the DCI

recommending that such training not be continued in this Agency. felt that he could not speak for Bill

Nelson but he opined that DD/O would not oppose such action.
